INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

PCT/EP2004/051232

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	3, 4, 8	YES
	Claims	1, 2, 5-7	NO
Inventive step (IS)	Claims		YES
	Claims	1-8	NO
Industrial applicability (IA)	Claims	1-8	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

This report makes reference to the following documents:

D1: EP-A-1 072 814 (POCLAIN HYDRAULICS IND), 31
January 2001 (2001-01-31)

D2: DE 198 57 962 A (ZAHNRADFABRIK FRIEDRICHSHAFEN),
21 June 2000 (2000-06-21)

D3: US-A-4 823 636 (LALLIER JEAN-CLAUDE), 9 February
1988 (1988-02-09)

D4: EP-A-1 167 140 (LOHMANN & STOLTERFONT GMBH), 2
January 2002 (2002-01-02)

Document D1 is considered to constitute the prior art closest to the subject matter of claim 1 and discloses (the references in parentheses are to that document):

a brake arrangement (figures 1) with a disk assembly (100) which comprises a plurality of outer disks (104) and corresponding inner disks (102) which can be compressed by a piston arrangement (108) to ensure braking, a first hydraulic circuit (124) acting upon the piston arrangement (108) to ensure service braking and a second hydraulic circuit (120) acting upon the piston arrangement (108) to ensure parking braking,

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
-----------	---

the piston arrangement (108) comprising a service brake piston (114) which is in contact with the disk assembly (100), is impinged upon by the first hydraulic circuit (124), and in turn can be impinged upon by a separate, adjacent parking brake piston (116) which interacts with the second hydraulic circuit (120).

Consequently, all the technical features of claim 1 are known from a single document.

Moreover, the features of claims 2, 5 and 6 are also known from the same document (figure 1; features 118, 138).

Claims 1 and 7 are known from D2 (figure 1; column 3, lines 23-67).

The subject matter of claims 1, 2 and 5-7 is therefore not novel (PCT Article 33(2)).

The arrangement of the parking brake piston on the outer circumference of the service brake piston, as defined in claim 3, relates to a measure which appears to lie within the scope of what a person skilled in this field routinely makes, on the basis of familiar considerations.

The same is true of claims 4 and 8, which relate to conventional, generally known measures in the field of disk brake technology.

Claims 3, 4 and 8 therefore cannot make an inventive contribution to the subject matter of claims 1, 2 and 5-7 (PCT Article 33(3)).
